

# Science Long Term Planning

'Achieve Excellence'

What does it mean to get better at Science at William Stockton?

At William Stockton children get better at Science as they travel through the curriculum; they build on their prior knowledge of scientific concepts, procedures and skills. They work scientifically and develop a knowledge of how scientists work with increasing expertise and complexity. They are able to build on their prior disciplinary knowledge to ask and answer questions; make predictions; make observations; use equipment and measurements; identify and classify; engage in practical enquiry; record and report findings; draw conclusions; and analyse data

**Substantive Knowledge** - I know that

**Disciplinary Knowledge** - I know how to...

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
	<p align="center"><b>Working Scientifically</b></p> <p align="center"><b>Make observations:</b> Use their senses to explore the world around them</p> <p align="center"><b>Use Equipment and Measurements/Engage in Practical Enquiry:</b> Begin to explore age appropriate tools and equipment eg binoculars, magnifying glasses, magnets, water tubs, bubbles etc</p> <p align="center"><b>Engaging in Practical Enquiry (Investigating):</b></p>					

	<p>Explore what bodies can do          Observe changes          Explore collections of materials with similar and/or different properties          Explore how things work          Explore and talk and about different forces          Plant and care for seeds and plants.</p>				
<p>Nursery</p>	<p><b>Living Things - My Body</b></p> <p>Name body parts: arm, leg, nose, ear, eyes, head, wrist, ankle, elbow, shoulder, neck</p> <p>Describe what our body parts can do.</p>	<p><b>Materials</b></p> <p>Describe objects with similar/different properties: hard, cold, soft, by colour</p>	<p><b>Forces</b></p> <p>Describe if you push something that it moves</p>	<p><b>Animals, Habitats and environment</b></p> <p>Name some animals they are likely to see in their familiar world eg farm animals// mini beasts/ zoo animals</p>	<p><b>Plants/ Changes</b></p> <p>Talk about the life cycle of a butterfly</p> <p>Describe growth and decay eg plants, flowers, fruit &amp; vegetables</p>
<p><b>Seasonal Changes</b></p> <p>It gets colder in the winter and warmer in the summer</p>					
<p>Reception</p> <p>End Points</p>	<p><b>Working Scientifically</b></p> <p><b>Asking and Answering Questions:</b></p> <p>Ask simple questions about why different materials are used for different things.</p> <p><b>Make Observations:</b></p> <p>Use senses to explore the natural world around them.          Make observational drawings          Sort into groups using observational skills: sort images and objects into groups.</p> <p><b>Use Equipment and Measurements/Engage in Practical Enquiry</b></p> <p>Use age appropriate tools and equipment eg binoculars, magnifying glasses, magnets</p> <p><b>Identifying and classifying:</b></p> <p>Sort items into groups based on their properties.</p> <p><b>Record and Reporting Findings</b></p> <p>Use age appropriate scientific vocabulary          Use pictures to show their science learning.</p>				

	<p style="text-align: center;"><b>Drawing Conclusions</b> Begin to explain why something has happened</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 25%; text-align: center;">Materials</th> <th style="width: 25%; text-align: center;">Habitats and Environments</th> <th style="width: 25%; text-align: center;">Living Things</th> <th style="width: 25%; text-align: center;">Plants and changes</th> </tr> </thead> <tbody> <tr> <td style="vertical-align: top;"> <p>Name some everyday materials eg wood, glass and plastic</p> <p>Describes similarities and differences in relation to familiar objects and materials</p> </td> <td style="vertical-align: top;"> <p>Describe some habitats that different animals like to live in Eg woodland, ocean, desert</p> <p>Describe how to show care and concern for living things</p> </td> <td style="vertical-align: top;"> <p>Name/ match adult/baby animals</p> <p>Sort and classify animals into chosen criteria eg legs/ non legs, Farm animals/ zoo animals, nocturnal</p> </td> <td style="vertical-align: top;"> <p>Explain plants are living</p> <p>Name and describe some common plants they see in their familiar world - Daisy, Daffodil, Dandelion, Buttercup, blossom tree</p> </td> </tr> </tbody> </table> <p style="text-align: center;"><b>Seasonal Changes</b> Describe the effect of Autumn , Winter, Spring &amp; Summer (season) on the natural world around them.</p>	Materials	Habitats and Environments	Living Things	Plants and changes	<p>Name some everyday materials eg wood, glass and plastic</p> <p>Describes similarities and differences in relation to familiar objects and materials</p>	<p>Describe some habitats that different animals like to live in Eg woodland, ocean, desert</p> <p>Describe how to show care and concern for living things</p>	<p>Name/ match adult/baby animals</p> <p>Sort and classify animals into chosen criteria eg legs/ non legs, Farm animals/ zoo animals, nocturnal</p>	<p>Explain plants are living</p> <p>Name and describe some common plants they see in their familiar world - Daisy, Daffodil, Dandelion, Buttercup, blossom tree</p>
Materials	Habitats and Environments	Living Things	Plants and changes						
<p>Name some everyday materials eg wood, glass and plastic</p> <p>Describes similarities and differences in relation to familiar objects and materials</p>	<p>Describe some habitats that different animals like to live in Eg woodland, ocean, desert</p> <p>Describe how to show care and concern for living things</p>	<p>Name/ match adult/baby animals</p> <p>Sort and classify animals into chosen criteria eg legs/ non legs, Farm animals/ zoo animals, nocturnal</p>	<p>Explain plants are living</p> <p>Name and describe some common plants they see in their familiar world - Daisy, Daffodil, Dandelion, Buttercup, blossom tree</p>						
Year 1	<p style="text-align: center;"><b>Working Scientifically</b> <b>Asking and Answering Question:</b> Use everyday language/begin to use simple scientific words to ask or answer a scientific question.</p> <p style="text-align: center;"><b>Making Predictions:</b> Begin to say what might happen in an investigation.</p> <p style="text-align: center;"><b>Making Observations:</b> Observe objects, materials and living things and describe what they see and using their senses Draw their observations</p> <p style="text-align: center;"><b>Equipment and Measurements:</b> Use simple, nonstandard equipment and measurements in a practical task.eg lego/hands/feet</p> <p style="text-align: center;"><b>Identifying and Classifying:</b> Sort and group objects, materials and living things, with help, according to simple observational features and based on their obvious properties</p> <p style="text-align: center;"><b>Engaging in Practical Enquiry (Investigating):</b> Follow instructions to complete a simple test individually or in a group. Break apart items to investigate what can be found</p>								

**Recording and Reporting Findings:**

Begin to record simple data. Talk about their findings and explain what they have found out.

Use a predefined table to record results

Record results in a table using observational drawings/photographs

**Drawing Conclusions:**

Explain, with help, what they think they have found out.

<p><b>Recording and Reporting Findings:</b>                      Begin to record simple data. Talk about their findings and explain what they have found out.                      Use a predefined table to record results                      Record results in a table using observational drawings/photographs</p> <p><b>Drawing Conclusions:</b>                      Explain, with help, what they think they have found out.</p>				
Chemistry	Biology	Biology	Biology	Scientist and Scientific investigation focus
<p><b>Everyday Materials</b></p> <p>How can we sort different materials?</p>	<p><b>Animals</b></p> <p>What do carnivores, herbivores and omnivores eat?</p>	<p><b>Animals including humans</b></p> <p>What senses do I use when I make and eat popcorn?</p>	<p><b>Plants</b></p> <p>What happens to a strawberry plant as it grows?</p> <p>Does the colour affect the taste of the strawberry?</p>	<p><b>David Attenborough and Working Scientific focus</b></p> <p>(Review of years learning for consolidation through investigations)</p>
<p>Objects can be made of different materials, eg the school wall is made of brick. The school fence is made of metal.</p> <p>Materials have different properties . eg.hard, shiny.</p>	<p>There are lots of different types of creatures in the world. Eg. fish, birds</p> <p>Animals look different. eg. birds have wings, fish have scales</p> <p>Animals eat different types of foods eg carnivores eat meat, Omnivore - eat meat and plants, Herbivore eat plants</p>	<p>Humans have 5 senses; e.g. mouth to taste and ears to listen.</p> <p>Humans need a variety of food to help them grow and stay healthy.</p>	<p>There are wild flowers growing on our school field. Daisies, buttercups, nettles, clover</p> <p>Wild flowers grow naturally, they don't need to be planted.</p>	<p>David Attenborough is a scientist.</p> <p>David Attenborough is interested in looking after our planet.</p> <p>David Attenborough makes programmes about our world.</p> <p><b>Example investigation: what is the most common creature that visits our</b></p>

				wildflower garden?
	<b>PHYSICS</b> Seasonal Change			
	Name the four seasons. In Spring the trees have blossom. In Summer the trees have leaves. In Autumn the leaves fall off the trees. In Winter the trees have no leaves. The days are shorter in winter and longer in summer.			
Year 2	<b>Working Scientifically</b> <b>Asking and Answering Questions</b> Ask simple questions and know that they can be answered/investigated in different ways. Use scientific language to ask simple questions and recognise they can be answered in simple ways. Research secondary sources, such as books and video clips.  <b>Making Predictions:</b> Begin to make predictions about what might happen in an investigation linking to what they already know.  <b>Making Observations:</b> Observe closely and describe changes over time using their senses Begin to describe how things have changed over time. Record the results through annotated drawings or simple observation tables. Make comparisons between different observations  <b>Equipment and Measurements:-</b> Use simple equipment, such as hand lenses or egg timers to take measurements, make observations and carry out tests Use a ruler and a sand timer to carry out simple tests Use a stop watch accurately  <b>Identifying and Classifying</b> Group materials, living things and objects, noticing changes over time and beginning to see patterns Sort into groups using observational skills, giving reasons why.  <b>Engaging in Practical Enquiry (Investigating):</b> Perform simple tests (changing one variable and measuring its effect on another) Begin to understand that to complete a fair test only one variable can change.  <b>Recording and Reporting Findings:</b>			

<p>Recording and reporting findings - Gather data, record and talk about their findings, in a range of ways, using simple scientific vocabulary. Gather data and record findings in a range of ways e.g. tally chart, Venn diagram, pictogram. Use predefined tables to record information</p> <p><b>Drawing Conclusions:</b> Use simple scientific language to explain what they have found out Talk about results using appropriate scientific vocabulary.</p> <p><b>Analysing Data:</b> Identify simple patterns and/or relationships using simple comparative language</p>				
<b>Chemistry</b>	<b>Biology</b>	<b>Biology</b>	<b>Biology</b>	<b>Scientist and Scientific investigation focus</b>
<p><b>Uses of everyday materials</b> Which is the best material to mop up a spillage?</p>	<p><b>Animals including Humans</b> Do bananas make us run faster?</p>	<p><b>Living things and their habitats</b> What is the most suitable habitat for a woodlouse?</p>	<p><b>Plants</b> Can plants grow without water, light or warmth?</p>	<p><b>Louis Pasteur and Working Scientific focus</b> (Review of years learning for consolidation through investigations)</p>
<p>Different materials are used for different objects depending on the purpose</p> <p>Materials are used for more than one thing.eg metal for coins, cans etc</p> <p>Squashing, bending, twisting and stretching changes the shape of some materials</p> <p>Some materials are more absorbent than others.</p> <p>Recycling materials is</p>	<p>Name animal offspring kitten - cat; puppy - dog; duckling - duck; calf - cow; lamb - sheep.</p> <p>Animals including humans need food, air and water to survive.</p> <p>It's important to wash my hands with soap and water and that I need to shower/bath regularly to keep clean.</p> <p>Fruits and vegetables</p>	<p>Animals move in order to survive.</p> <p>Exercise keeps animal's bodies in good condition and increases survival chances.</p> <p>All animals eventually die.</p> <p>Animals have young when they reach maturity.</p> <p>Animals get their food from plants and other animals.</p> <p>A food chain explains what animals feed on.</p> <p>Animals have different sources of food.</p>	<p>Seeds and bulbs grow into mature plants.</p> <p>Seeds need water to germinate.</p> <p>Plants need water, light and warmth to grow.</p> <p>Plants are living because they breathe, move and grow.</p>	<p>Describe when and why we should wash our hands.</p> <p>Louis Pasteur taught us about germs.</p> <p><b>Example investigation: What effect does bacteria have on food? What are the best conditions for bacteria?</b></p>

	important	<p>are healthy foods</p> <p>Food that contains lots of sugar and fat are not so healthy</p>			
Year 3/4 Cycle 1	<p style="text-align: center;"><b><u>Working Scientifically Year 3</u></b></p> <p style="text-align: center;"><b><u>Asking and Answering Question:</u></b></p> <p style="text-align: center;">Use ideas from what they know and what they have observed to pose questions independently about the world around them. Suggest ways to answer questions using scientific enquiries.</p> <p style="text-align: center;"><b><u>Making Predictions:</u></b></p> <p style="text-align: center;">Make predictions and begin to give reasons for their thoughts linking them to their previous knowledge.</p> <p style="text-align: center;"><b><u>Making Observations:</u></b></p> <p style="text-align: center;">Make decisions about what to observe during an investigation so that they are answering an investigative question.</p> <p style="text-align: center;"><b><u>Equipment and Measurements:</u></b></p> <p style="text-align: center;">Take accurate measurements using standard units (in cm, kg,ml,degrees) using digital thermometers, rulers, scales and measuring cylinders.</p> <p style="text-align: center;"><b><u>Identifying and Classifying:</u></b></p> <p style="text-align: center;">Talk about criteria for grouping, sorting and categorising, Begin to see patterns and relationships between how objects are grouped and sorted. Identify the criteria for grouping objects</p> <p style="text-align: center;"><b><u>Engaging in Practical Enquiry (Investigating):</u></b></p> <p style="text-align: center;">Identify variables that can be changed within an investigation Discuss enquiry methods and describe a fair test means that only one variable will change.</p> <p style="text-align: center;"><b><u>Recording and Reporting Findings:</u></b></p> <p style="text-align: center;">Record their findings using scientific language and present in note form, writing frames, diagrams, tables and charts - have support with the layout of these where necessary. Gather and record data, presenting in a variety of ways e.g. tables, bar charts, diagrams with increasing independence but support given with the layout Gather and record data, presenting in a variety of ways e.g. tables, bar charts, diagrams.</p> <p style="text-align: center;"><b><u>Drawing Conclusions:</u></b></p> <p style="text-align: center;">Draw, with support, a simple conclusion based on an enquiry observation explaining how what they have found out answers the enquiry question</p> <p style="text-align: center;"><b><u>Analysing Results:</u></b></p> <p style="text-align: center;">Gather, record and use data in a variety of ways to answer a simple enquiry question</p>				

**Working Scientifically Year 4**

**Asking and Answering Question:**

Suggest relevant questions and know they can be answered in a variety of ways including investigations and using secondary sources such as ICT.

Ask relevant questions and begin to explain the best way to answer them using scientific enquiries and secondary sources.

**Making Predictions:**

Make predictions and give a reason using simple scientific vocabulary using what they have found out from previous tests.

**Making Observations:**

Make systematic and careful observations ensuring that they are recording the data appropriately.

Make observations at time intervals over a set time period

Record observations clearly choosing the most appropriate method for doing so.

**Equipment and Measurements:**

Take accurate measurements using standard units and a range of equipment , including thermometers and data loggers.

Measure accurately in a variety of measures including smaller increments eg cm/mm, kg/g.

Read scales accurately

**Identifying and Classifying:**

Identify similarities/differences/changes when talking about scientific processes.

Identify links across scientific processes

Use and begin to create simple keys.

**Engaging in Practical Enquiry (Investigating):**

Make decisions about different enquiries, including recognising when a fair test is necessary

Identify variables that need to stay the same

Identify variables that need to change.

Identify what needs to be measured.

**Recording and Reporting Findings:**

Choose appropriate ways to record and present information, findings and conclusions (eg. tables, graphs, annotated diagrams)

Understand when fair testing is necessary and the effect of fair testing on an investigation

Suggest the most appropriate way to record and present data e.g. tables, bar charts, labelled diagrams.

**Drawing Conclusions:**

Use recorded data to make predictions, pose new questions and suggest improvements for further enquiries.

Talk about scientific processes when change occurs.

**Analysing Results:**

Use scientific evidence to support their findings.  
 Identify, with help, changes, patterns, similarities and differences in data to help form conclusions.

Chemistry	Biology	Physics	Biology	Biology	Scientist and Scientific investigation focus
<p><b>Rocks</b></p> <p>Which soil is most permeable?</p>	<p><b>Animals including Humans Y3</b></p> <p>Is shoe size proportional to height?</p>	<p><b>Sound</b></p> <p>Which material is best to use for ear defenders?</p>	<p><b>Living things and their habitats</b></p> <p>Does the amount of light affect woodlice movement?</p>	<p><b>Plants</b></p> <p>Which conditions increase the rate of germination?</p>	<p><b>Mary Anning and Working Scientific focus</b>            (Review of years learning for consolidation through investigations)</p>
<p>Rocks can be classified in different ways. Such as: igneous, sedimentary and metamorphic.</p> <p>Concrete is a manmade rock.</p> <p>Soil is made from rocks and organic matter.</p> <p>Fossils can be found in sedimentary rocks.</p> <p>Fossils are formed over thousands of years where organic matter is buried and crushed by sediment.</p>	<p>Different animals are adapted to eat different foods</p> <p>Humans get nutrition from the foods they eat.</p> <p>Humans have a skeleton to protect organs and help them move.</p> <p>Some animals have skeletons to support their bodies and protect their organs.</p> <p>Muscles are connected to bones and move them when they contract.</p>	<p>Sound is produced when an object vibrates.</p> <p>Sound travels to our ears by vibrating the air.</p> <p>Sound travel can be blocked.</p> <p>Sound moves through all materials by making them vibrate.</p> <p>A stronger vibration gives a louder sound.</p> <p>Faster vibrations make a higher pitched sound..</p> <p>Sounds get fainter as they get further away.</p>	<p>Living things can be divided into groups based upon their characteristics</p> <p>Changes to the environment can affect habitats in different ways.</p> <p>Living things are affected by changes to the environment.</p> <p>Different food chains occur in different habitats.</p> <p>Human activity significantly affects the environment</p>	<p>Plants are producers, they make their own food.</p> <p>Their leaves absorb sunlight and carbon dioxide which makes their food.</p> <p>Plants have roots, which provide support and draw water from the soil.</p> <p>Water is transported through the plant.</p> <p>Insects can pollinate flowers to help them produce seeds.</p> <p>Seeds are dispersed in lots of ways. They make new plants.</p> <p>Seeds/bulbs require</p>	<p>Mary Anning was a fossil collector.</p> <p>She found fossils along the southern coast of Britain</p> <p>Her findings supported scientific thinking about prehistoric life and the history of the Earth.</p> <p><b>Example investigation: Do plants need soil to grow? Observe and classify different soil structures. Fossil hunt - trip</b></p>

					the right conditions to germinate and grow.	
Year 3/4 Cycle 2	<b>Chemistry</b>	<b>Biology</b>	<b>Physics</b>	<b>Physics</b>	<b>Physics</b>	<b>Scientist and Scientific investigation focus</b>
	<b>States of Matter</b>  What temperature do materials change state?	<b>Animals including Humans Y4</b>  How do different liquids affect the enamel of our teeth?	<b>Electricity</b>  Which materials make effective insulators?	<b>Light</b>  How does the distance between the shadow puppet and the screen affect the size of the shadow?	<b>Forces and magnets</b>  How do different surfaces change the distance an object travels?	<b>Cai Lun and Working Scientific focus</b> (Review of years learning for consolidation through investigations)
	Materials can be divided into solids, liquids and gases.  Heating causes solids to melt into liquids and liquids evaporate into gases.  Cooling causes gases to condense into liquids and liquids to freeze into solids.  Measure and research the temperature in degrees Celsius (°C) at which materials change state.  Water evaporates and condenses as rain in the water cycle.	Animals have different teeth to help them eat.  Different teeth do different jobs.  Food is broken down by the teeth and then travels to the stomach and intestines where nutrients go into the blood.  The blood takes nutrients around the body.  Nutrients produced by plants move to animals that eat them.	A source of electricity (mains or battery) is needed for electrical devices to work.  A circuit needs cells and wires. It can also be made using bulbs, switches and buzzers.  Electricity sources send electricity around a circuit.  A complete circuit is needed for electricity to flow.  An insulator stops electricity travelling through it.  A conductor encourages electricity to travel through it.	There must be light for us to see. Without light it is dark.  We need light to see everything including reflective surfaces.  Transparent materials let light travel through them and opaque materials do not let light through.  Opaque objects cause darker shadows.  Beams of light reflect off some materials.  Shiny materials reflect light rays better than non shiny materials.  The sun can damage	Forces are a push or a pull.  The speed that objects move changes on different surfaces because of friction.  Magnets attract or repel each other.  Magnets have a north pole and a south pole.  Magnet forces can attract from a distance.  Magnets can attract through some materials.  Some materials are not magnetic.	Cai Lun invented paper.  He used tree bark, bamboo fibres and water.  This discovery has led to a big change for the whole world.  Example investigation: Is there a pattern in how long it takes different sized ice lollies to melt?

			Metal is a good conductor.	your eyes and you can protect them.		
Year 5/6 Cycle 1	<p style="text-align: center;"><b><u>Working Scientifically (Y5)</u></b></p> <p style="text-align: center;"><b><u>Asking and Answering Question:</u></b>  Raise different types of scientific questions, and hypotheses ensuring that the question is something that can be tested.  Identify how the question is finding out the information that is needed</p> <p style="text-align: center;"><b><u>Making Predictions:</u></b>  Make predictions and give a reason using scientific vocabulary use prior learning and understanding to back up the prediction  Use findings to make new predictions for further comparative and fair tests.</p> <p style="text-align: center;"><b><u>Making Observations:</u></b>  Plan and carry out comparative and fair tests, making systematic and careful observations.  Record and analyse the observations  Begin to identify any anomalies</p> <p style="text-align: center;"><b><u>Equipment and Measurements:</u></b>  Take measurements using a range of scientific equipment including Newton Metres with increasing accuracy and precision.  Decide on what has to be measured and identify the best unit for measuring.</p> <p style="text-align: center;"><b><u>Identifying and Classifying:</u></b>  Use and develop keys to identify, classify and describe living things and materials.  Identify patterns in results  Begin to identify anomalies in results where results aren't following the expected pattern.</p> <p style="text-align: center;"><b><u>Engaging in Practical Enquiry (Investigating):</u></b>  Plan a range of science enquiries, including comparative and fair tests.  Begin to plan independent investigations to answer an enquiry question  Identify and begin to control variables, giving reasons why some variables need to be controlled.</p> <p style="text-align: center;"><b><u>Recording and Reporting Findings:</u></b>  Record data and results of increasing complexity using scientific diagrams, labels, classification keys, tables, bar and line graphs and models  Discuss the most appropriate way to record and present data, giving reasons why.</p> <p style="text-align: center;"><b><u>Drawing Conclusions:</u></b>  Clearly communicate and justify their conclusions on a hypothesis.  Begin to recognise how scientific ideas change over time.  Make links between current learning and prior learning and use this to support them in writing a conclusion</p>					

**Analysing Results:**

Use relevant scientific language and illustrations to discuss, communicate and justify their scientific ideas.  
Begin to identify where anomalies have occurred and talk about why these have occurred.

**Working Scientifically (Year 6)**

**Asking and Answering Question:**

Pose/select the most appropriate line of enquiry to investigate scientific questions.  
Identify how to create an investigation from developing an enquiry question and a hypothesis.

**Making Predictions:**

Make predictions and give a reason using scientific vocabulary.  
Base predictions on findings from previous investigation.  
Where appropriate, use mini-investigation to back up their prediction.

**Making Observations:**

Make their own decisions about which observations to make.  
Use test results and observations to make predictions or set up further comparative or fair tests.  
Record and analyse the observations  
Identify any anomalies and explain why they have occurred.

**Equipment and Measurements:**

Decide on what to measure in an investigation to answer an enquiry question.  
Choose the most appropriate equipment in order to take measurements, explaining how to use it accurately.  
Take accurate measurements eg Pulse.  
Decide how long to take measurements for, checking results with additional readings.

**Identifying and Classifying:**

Identify and explain patterns seen in data, in scientific processes and between investigations.

**Engaging in Practical Enquiry (Investigating):**

Select and plan the most suitable line of enquiry, explaining which variables need to be controlled and why, in a variety of comparative and fair tests.  
Set up and plan independent investigations to test hypotheses and answering a clear enquiry question to answer  
Identify the dependent and independent variables and how this can support with developing an investigation

**Recording and Reporting Findings:**

Choose the most effective approach to record and report results  
Present the results in a clear organised way that explains the results of the investigations.  
Use Mathematical knowledge to find the mean of a set of data

**Drawing Conclusions:**

Explain what the investigation has found out and explain the results linking the investigation with the theoretical knowledge of Science.

Use a range of secondary sources to support or refute ideas.  
 Identify validity of conclusion and required improvement to methodology.  
 Explain any anomalies and why these may have occurred.

**Analysing Results:**

Identify and explain causal relationships in data and identify evidence that supports or refutes their findings, selecting fact from opinion.
